# Our Way of Service

## Maximize your Asset Value

Mitsubishi Hitachi Power Systems (MHPS) has comprehensive knowledge and capabilities to support products in your Power Station which is not limited to Operation & Maintenance support but also provide solutions to enhance your product to fit current power station needs.

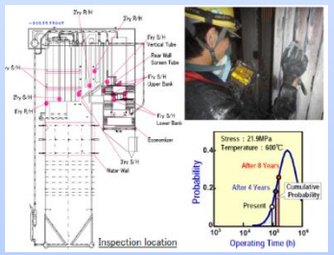
## Technology for Support

**We improve your power station availability**

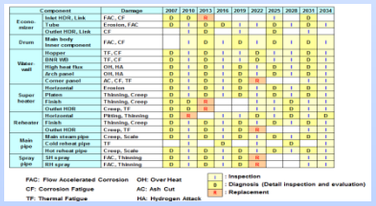
### RBM(Risk Based Maintenance)

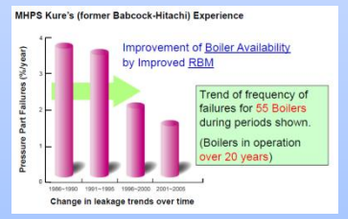
- Based on our assessment, we provide preventive maintenance plan to ensure your products stay in good conditions.
- We propose design improvements to further enhance your power station availability.

Assessment



Maintenance plan





Improve Availability

### RMS(Remote Monitoring Systems)

- We introduce a real-time, web based monitoring service for the remote monitoring of plants world wide using IT.
- We support operation of plants by analyzing operation data for abnormality diagnosis

**We Improve Your Power Station Asset Value with MHPS comprehensive knowledge and capabilities**

## Technology for Improvement

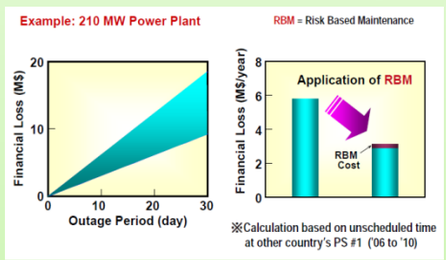
**Improve your power station performance and flexibility**

### Wide range of Products with latest technology

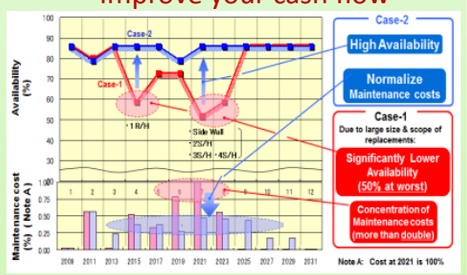
### Expected result of improvement

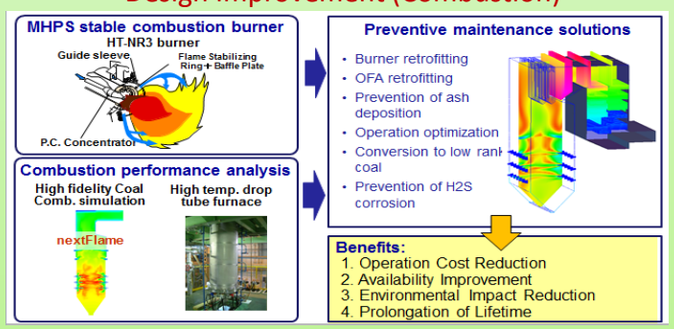
- Improve your power station cash flow by Life Cycle planning
- Improve the efficiency and availability of plant
- Adapt the fuel changes and/or change in load operation demand

Reduce Financial Damage



Improve your cash flow





Design Improvement (Combustion)
